

Dr.-Ing. Ali Khalifa

Computational multiphase flows | Particle processes | Machine learning

Technical University of Munich, Freising, Germany

ali.khalifa@tum.de | +49 171 3061101

Nationality: German / Jordanian

ORCID: 0000-0002-4822-3436 | [Google Scholar](#) | [LinkedIn](#)

Research profile

Mechanical engineer and postdoctoral researcher working on predictive modelling of particulate flows. Research combines particle-resolved simulation, Euler–Lagrange modelling and machine learning to understand and model cohesive agglomerate breakage and collisions in turbulent flows. DFG Co-Principal Investigator with university lecturing and student supervision experience.

Academic appointments

Postdoctoral Researcher, Technical University of Munich Chair of Process Systems Engineering, Freising, Germany.	11.2025–present
Postdoctoral Researcher, Helmut-Schmidt University Department of Fluid Mechanics, Hamburg, Germany.	10.2022–10.2025
Doctoral Researcher, Helmut-Schmidt University Department of Fluid Mechanics, Hamburg, Germany.	12.2016–09.2022
Student Research Assistant, Otto von Guericke University Laboratory of Fluid Dynamics and Technical Flows, Magdeburg, Germany.	12.2015–10.2016

Competitive research funding

DFG Research Grant | Co-Principal Investigator 12.2025–11.2028
Deagglomeration in turbulent flows: Particle-resolved investigation for detailed insights and advanced modeling.
German Research Foundation (DFG); reference KH 653/3-1; project 573724408.

- Secured funding for a student research assistant (HiWi) position at TUM and supervise the funded assistant.
- Contribute to supervision of the project's doctoral researcher at Helmut-Schmidt University, Hamburg.

Internal Research Funding (IFF), Helmut-Schmidt University 07.2023–06.2024
Competitively awarded one-year seed funding to develop an external research grant proposal; selected through a written application and oral presentation.

Education

Dr.-Ing., Helmut-Schmidt University, Hamburg With distinction; oral examination: 19.09.2022. Supervisor: Prof. Michael Breuer. Thesis: <i>Modeling and simulation of the breakage of cohesive particle agglomerates in turbulent wall-bounded flows.</i> DOI: 10.24405/14518 .	Sep. 2022
M.Sc., Chemical and Energy Engineering Otto von Guericke University, Magdeburg, Germany.	10.2013–04.2016
B.Sc., Mechanical Engineering University of Jordan, Amman, Jordan.	09.2008–01.2013

Teaching experience

Lecturer | Technical University of Munich

2026

Control Engineering (Regelungstechnik), summer semester 2026.

Machine Learning in Food and Life Sciences, winter semester 2026/27 (scheduled).

Teaching Assistant | Helmut-Schmidt University, Hamburg

Fluid Mechanics; Applied Fluid Mechanics.

Research supervision

Technical University of Munich

Alexander Todorov | Master's thesis

2026

Simulation of the atomization process for melt coating using OpenFOAM.

Julius Eckert | Student research assistant

2026

Algorithm for generating numerical agglomerates with specified fractal structures for DEM simulations.

Helmut-Schmidt University, Hamburg

Doctoral researcher | DFG project

Current

Contribute to doctoral supervision within the DFG-funded deagglomeration project in collaboration with the Hamburg team.

Hoang Huy Nguyen | Master's thesis

2025

Investigations on models for the breakup of particle agglomerates in homogeneous isotropic turbulence in the context of Euler–Lagrange simulations.

Hoang Huy Nguyen | Pre-master's research project

2025

Direct numerical simulation of homogeneous isotropic turbulence in a periodic box.

Jasper Gollwitzer | Master's thesis

2021

Application of artificial neural network-based models for agglomerate breakage by wall impact in Euler–Lagrange large-eddy simulations.

Jasper Gollwitzer | Pre-master's research project

2021

DEM simulations of agglomerate breakage by wall impact.

Constance Le Tacon | Pre-master's research project

2020

CFD simulations of fluid flow in configurations relevant to dry powder inhalers.

Honours and awards

Wissenschaftspreis (Science Award), Helmut-Schmidt University

2024

Co-recipient of the award for the best doctoral dissertation; awarded by Freunde und Förderer der Helmut-Schmidt-Universität / Universität der Bundeswehr e.V., March 2024.

Award for Social Excellence, University of Jordan

2013

Awarded by the University President for involvement in student organisations and extracurricular activities.

Leadership and service

Elected President, Student Union

2011–2012

University of Jordan, Amman.

Elected President, Energy Club

2010–2011

University of Jordan, Amman.

Co-founder and Manager, Mech-Family student organisation

2009–2010

University of Jordan, Amman.

Peer-reviewed journal articles

10 articles; 8 as first author
